

POINT OF SALE

We are Official ODOO Partner

Our Profile

Vperfect CS is an official partner of **Odoo**. We customize **Odoo** standard modules to create new customized modules by adding additional features to those modules to fulfill our clients requirements.

VPerfect CS Serves!

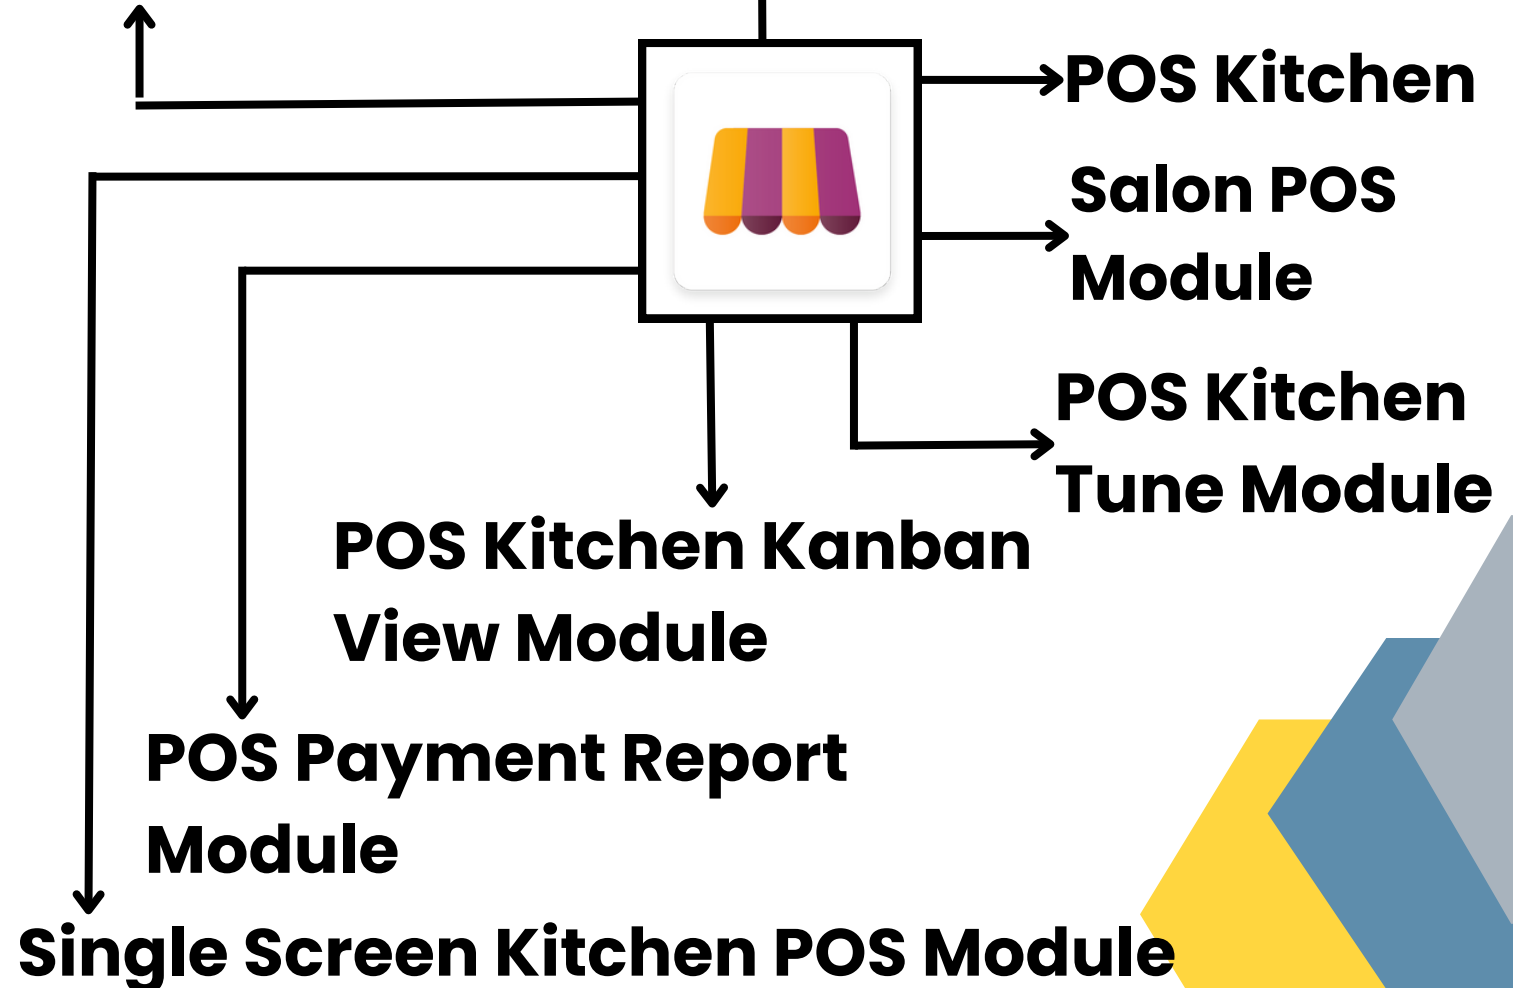

"Our essence is to serve for your betterment"

POS Modules

- VPCS has developed the following modules shown below for their proficient clients to manage their Point of Sale

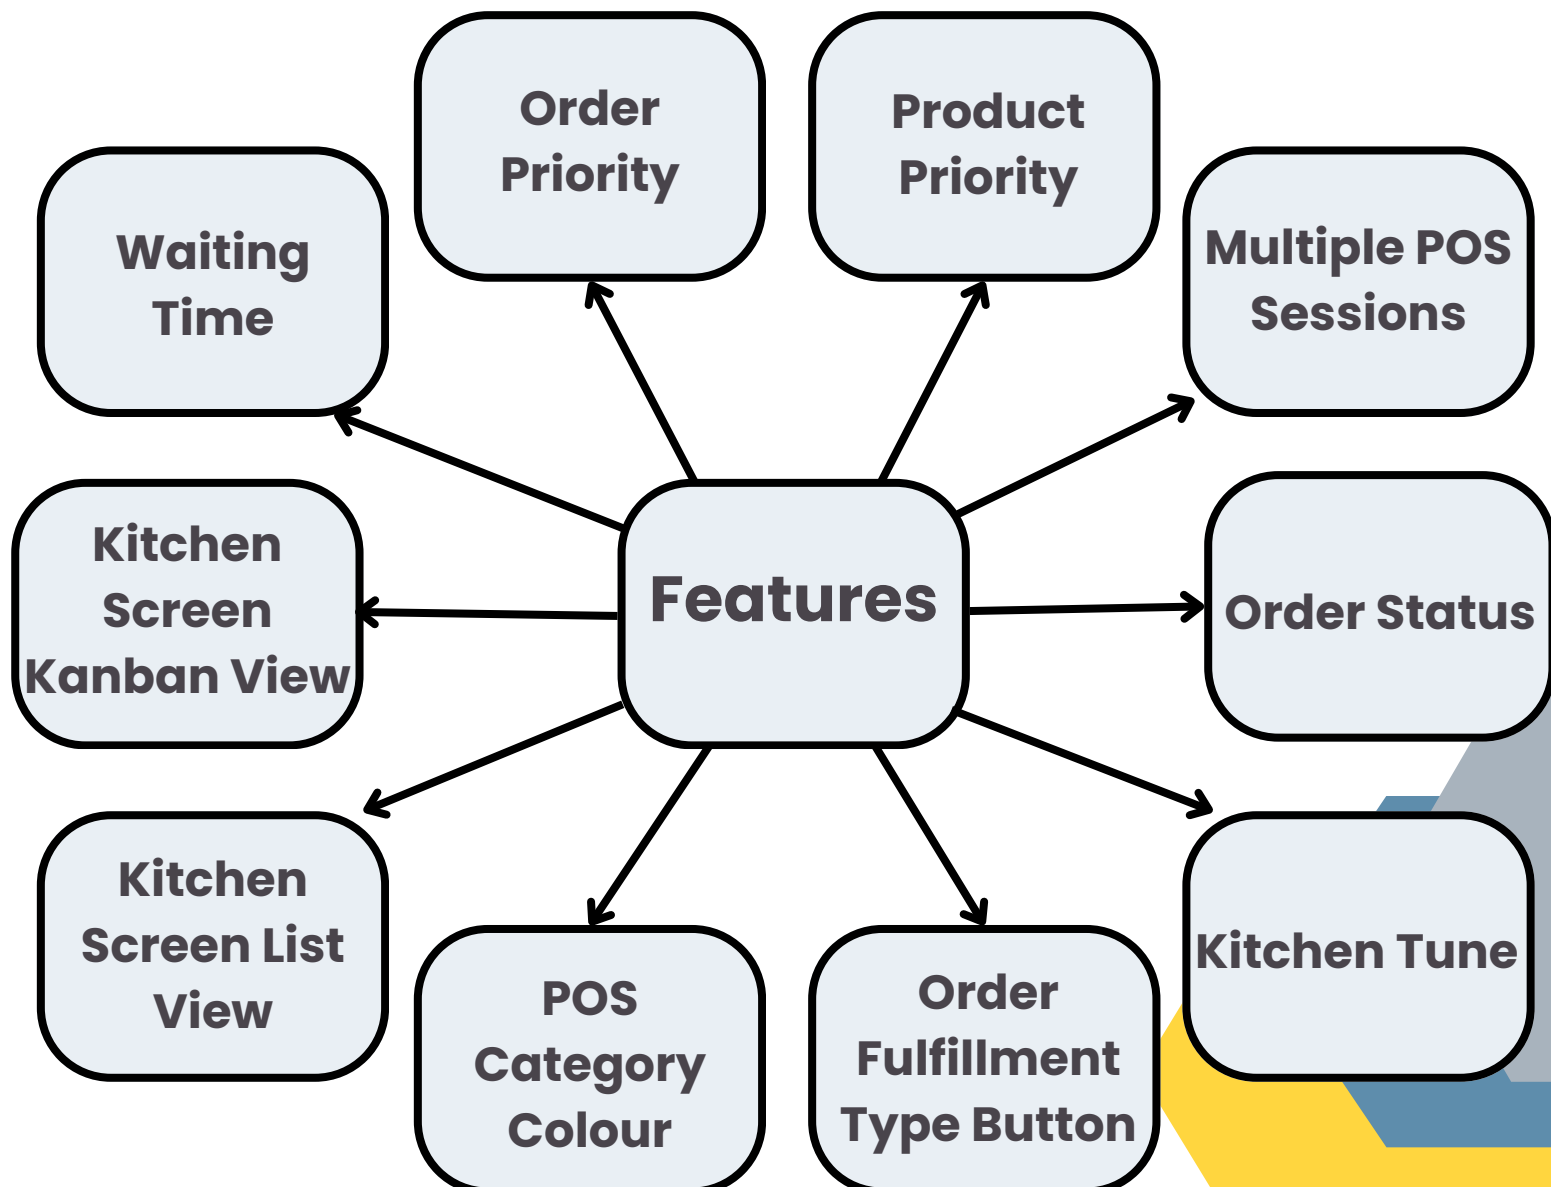

Multi-session Restaurant Sync POS Module

All in One Kitchen
POS Module

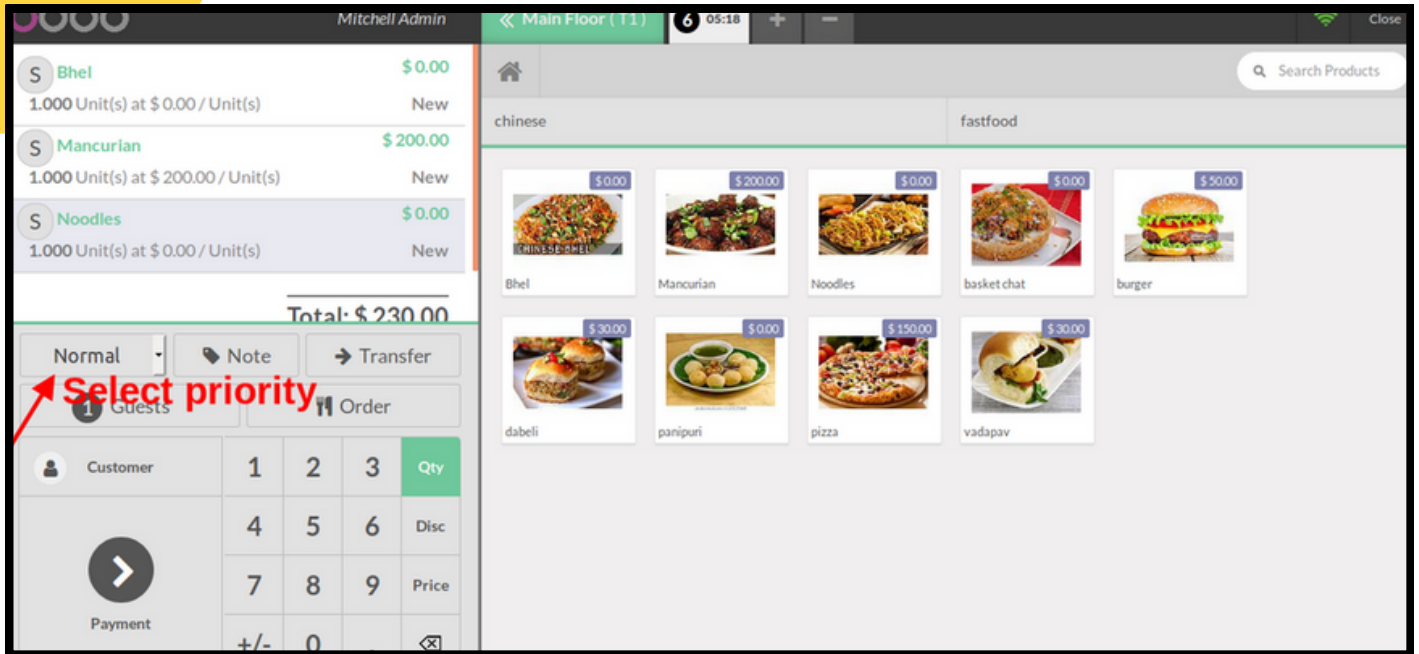

All in One Kitchen POS

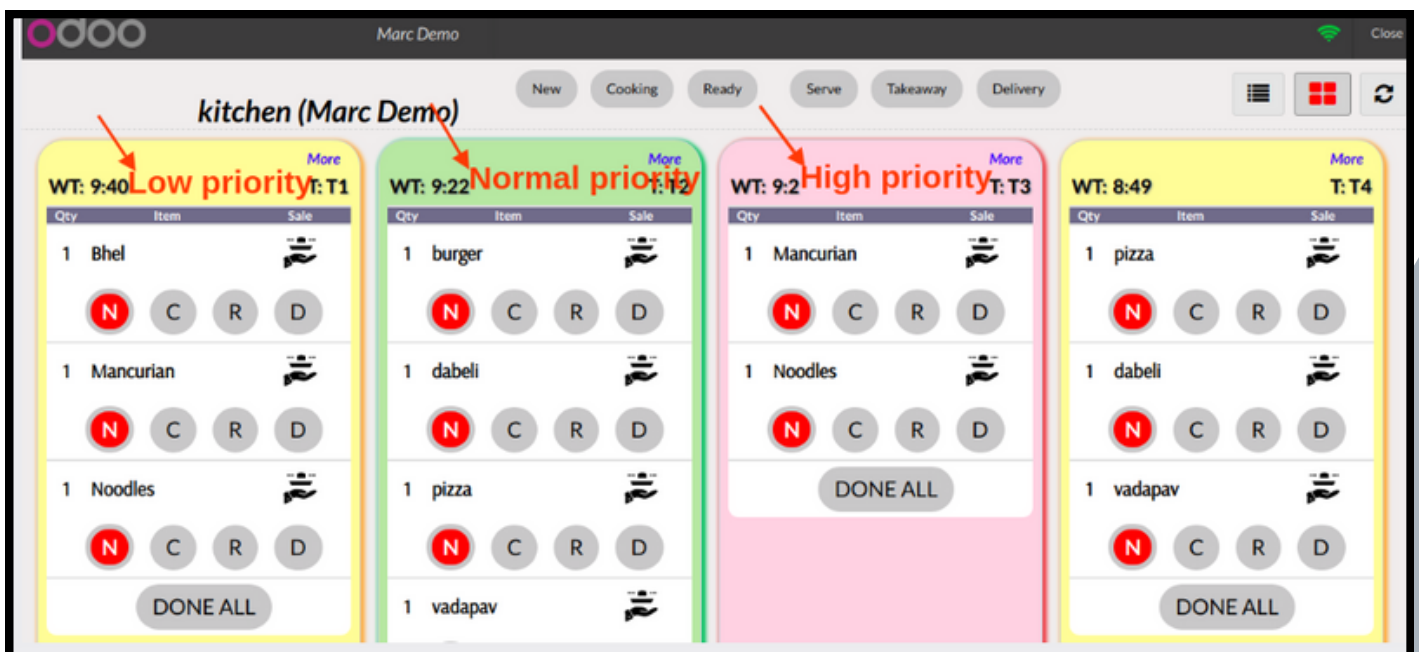

- This module comes with a bunch of features capable of catering to all the possible requirements for managing a **POS Kitchen**

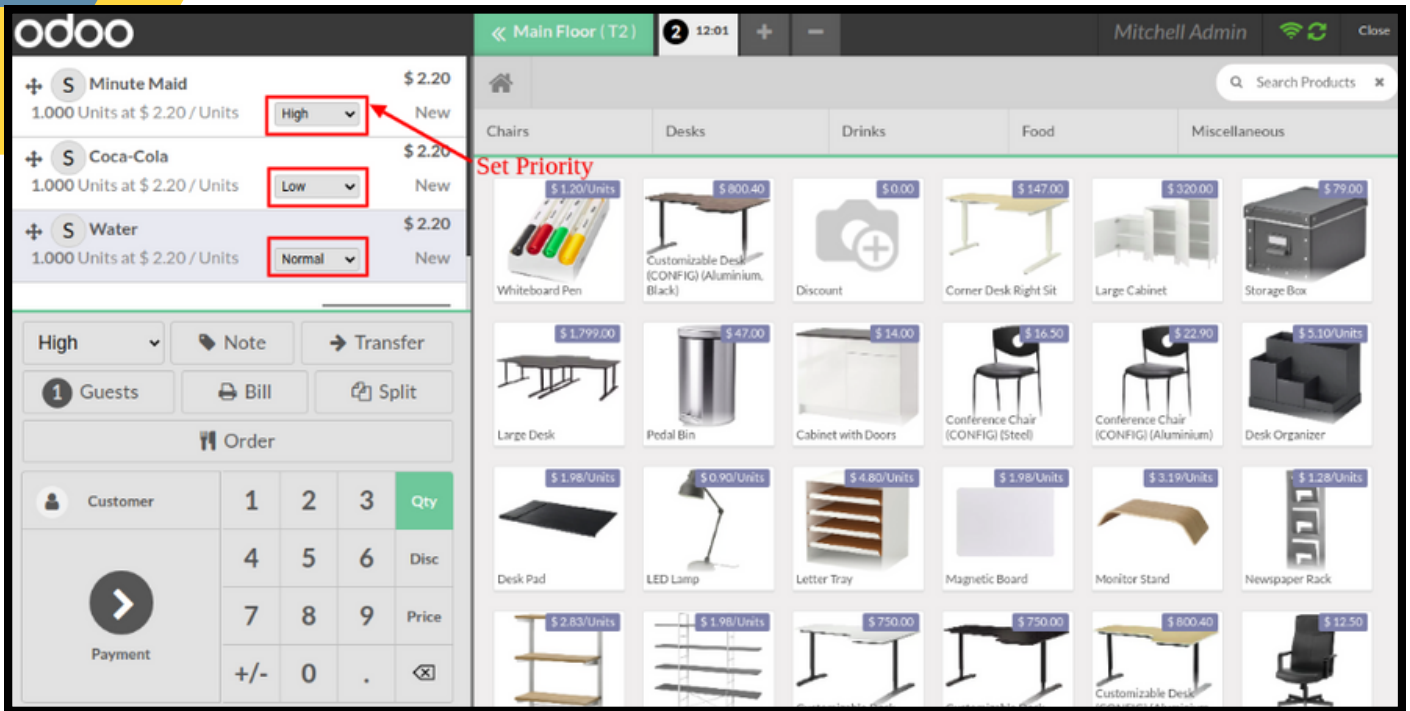

- These features are explained in detail in below:
- **Order Priority:** The user can configure the **Order Priority** before sending the order to the kitchen

- The figure below shows the **Kitchen Screen** showing the orders based on **Order Priority** which can be done by configuring the **Priority Colour** for each **Priority Type**

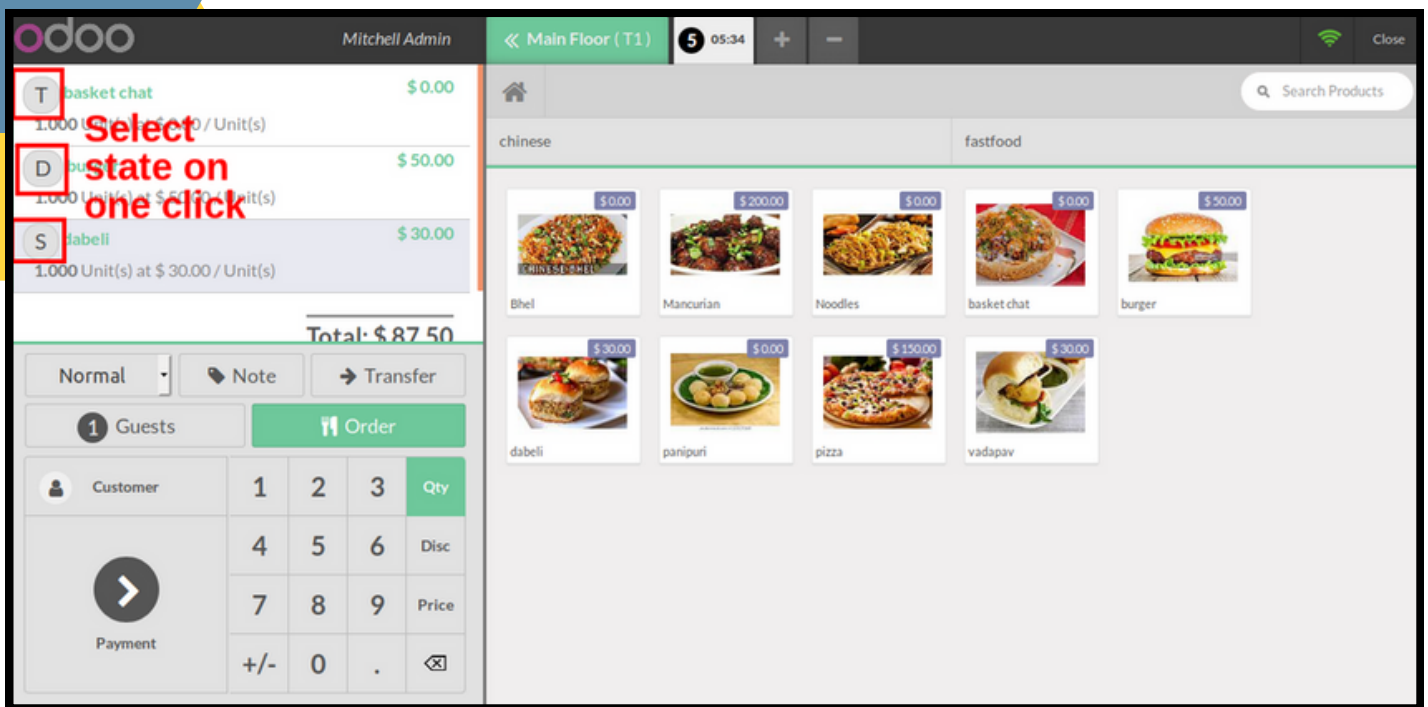

- **Product Priority:** The user can also configure the **Product Priority** when selecting the products as **Order Line** before sending the order to the kitchen

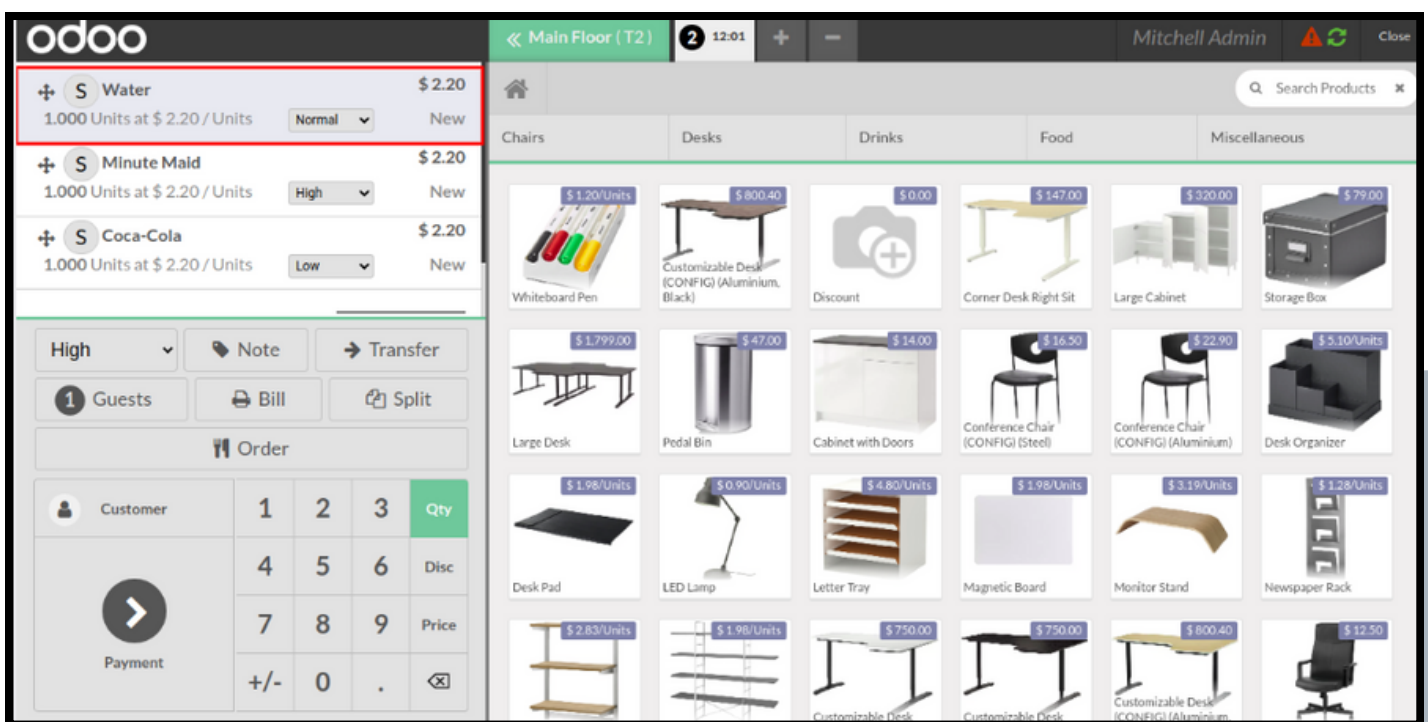

- **Kitchen Tune:** The module also has a feature of configuring a **Kitchen Tune** whenever a **New Order** is received on the **Kitchen Screen**
- **Order Fulfillment Type Button:** The user has the the option of choosing the **Order Fulfillment Type** by clicking on the small button on the left of the selected product
- The **Order Fulfillment Type** or **State** can be **Serve** or **Takeaway** or **Delivery**

- The figure below shows the feature of **Order Fulfillment Type** button

- Product Sequence:** The user can also set the **Product Sequence** of products while generating an order by dragging the items using the **+** icon

- **POS Category Colour:** We can set a colour for each category of our POS product which is displayed as a **Background Colour** on the kitchen screen

The screenshot shows the 'Kitchen (kitchen2)' interface. At the top, it displays 'Order Type: Main - T1', 'Order: 00004-032-0018', 'Order Placed: 06:15', 'Waiting Time: 6:31', and 'Priority: Normal'. Below this is a table with columns: #, Item Name, Category, Note, Quantity, and Status. The items are color-coded by category: Non-Veg items (Biryani, Butter chicken) have a red background, and Veg items (Palak paneer, Naan Roti) have a green background. Each item has a 'New' button and a status bar with 'Cooking', 'Ready To Serve', and 'Done' buttons.

#	Item Name	Category	Note	Quantity	Status
1	Biryani	Non-Veg		1	New Cooking Ready To Serve Done
2	Butter chicken	Non-Veg		1	New Cooking Ready To Serve Done
3	Palak paneer	Veg		1	New Cooking Ready To Serve Done
4	Naan Roti	Veg		1	New Cooking Ready To Serve Done
Total				4	

- It can be seen from the above figure that it displays the **Vegetarian** category in **Green colour** while the **Non-vegetarian** category is shown in **Red colour**
- The module also provides **Kanban View** and **List View** on the kitchen screen
- **Kanban View**

The screenshot shows the 'Kitchen (Demo User)' interface in Kanban view. It displays three columns representing different tables (T3, T4, T5). Each column shows a list of orders with their status (Ready To Serve, Cooking, or New) and background color coding by category. The items are color-coded: Non-Veg items (Butter Chicken, Omlet And Bre...) have a red background, and Veg items (Naan Roti, Salad, Mushroom Soup Veg, Daal) have a green background. Each item has a 'New' button and a status bar with 'Cooking', 'Ready To Serve', and 'Done' buttons.

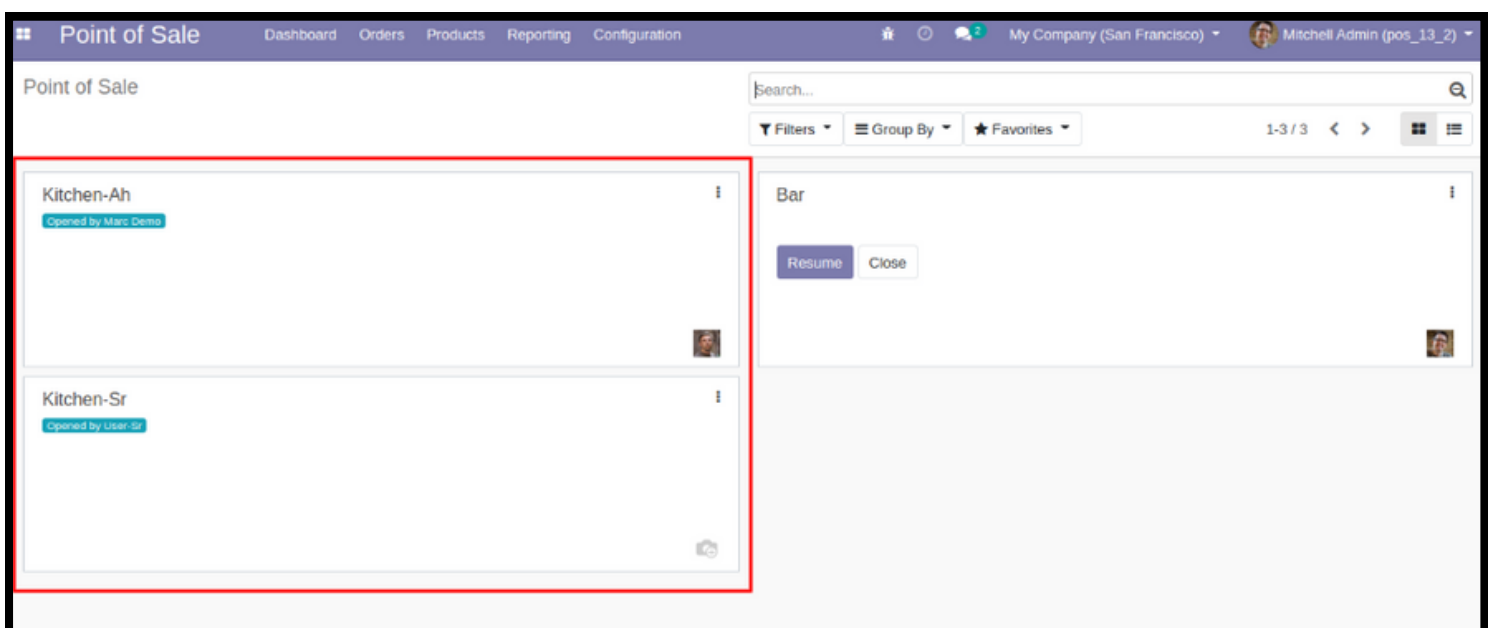

Table	Order	Item	Category	Qty	Status
T3	00002-006-0004	1 Butter Chicken	Non Veg	2	Ready To Serve
		2 Naan Roti	Veg	5	Cooking
		3 Salad	Veg	1	New
T4	00002-006-0005	1 Daal	Veg	1	New
		2 Naan Roti	Veg	3	Cooking
		3 Omlet And Bre...	Non Veg	1	New
		4 Salad	Veg	1	New
T5	00002-006-0006	1 Mushroom Soup Veg	Veg	5	New
		2 Salad	Veg	2	Cooking
		3 Omlet And Bre...	Non Veg	5	New

- **List View**

The screenshot displays a kitchen management interface for a user named 'Demo User'. It shows two orders, T3 and T4, each with a list of items and their status. Order T3 includes Butter Chicken, Naan Roti, and Salad. Order T4 includes Daal, Naan Roti, Omlet And Bread, and Salad. Each item has a status button (New, Cooking, Ready To Serve, Done) and a quantity. The interface also shows waiting times and priorities for each order.

#	Item Name	Category	Note	Quantity	Status
Order T3: Main Floor T3, Order: 00002-006-0004, Order Placed 04:35, Waiting Time 2:36, Priority Normal					
1	Butter Chicken	Non Veg		2	New, Cooking, Ready To Serve, Done
2	Naan Roti	Veg	Plain Roti	5	New, Cooking, Ready To Serve, Done
3	Salad	Veg		1	New, Cooking, Ready To Serve, Done
Total				8	
Order T4: Main Floor T4, Order: 00002-006-0005, Order Placed 04:35, Waiting Time 2:7, Priority Normal					
#	Item Name	Category	Note	Quantity	Status
1	Daal	Veg		1	New, Cooking, Ready To Serve, Done
2	Naan Roti	Veg		3	New, Cooking, Ready To Serve, Done
3	Omlet And Bread	Non Veg		1	New, Cooking, Ready To Serve, Done
4	Salad	Veg		1	New, Cooking, Ready To Serve, Done

- **Waiting Time:** The module also displays the **Waiting Time** on the kitchen screen for each order
- **Multiple POS Sessions:** The module provides the feature of operating various **POS Sessions** simultaneously

- **Order Status:** The **Order Status** can seamlessly be updated on the kitchen screen which is automatically synced onto the **Order Screen**

Multi-session Restaurant Sync POS

- The Odoo standard module allows the user to work on a single session in POS at a time

**MULTI SESSION
SYNC
RESTAURANT**

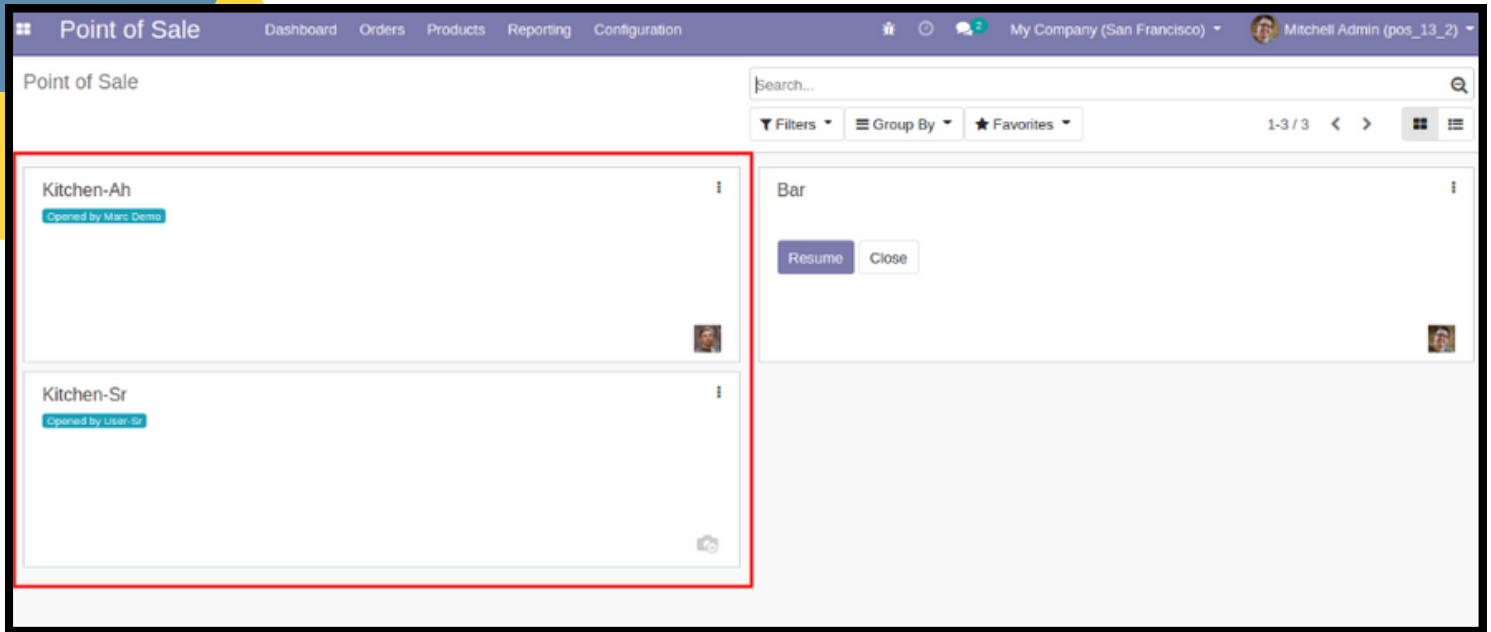

Multi-session Restaurant extensions for the
Point of Sale.

 *PerfectCS*

www.vperfectcs.com 

- To operate multiple sessions simultaneously for a POS, we at VPCS have developed a module that allows the user to have multiple sessions in their POS that instantaneously syncs all the data from all the sessions to be made available to the user at their desired place in the system to have some Useful Insights

- The picture below shows the module with multiple ongoing sessions in **POS**

Salon POS

- This module allows the user to manage a **Salon** as a **POS**
- This module is specially designed for salons with most features of useful to a manager

By : Vperfectcs

- The product should be configured as a **Service** and is made available in POS
- When an order is confirmed in POS a **Sale Order** with **Invoice** is automatically generated in the system
- A **Salon Request** is also created in the system if the **Salon Booking Management Module** of **VPCS** is also used in the organisation

• Salon Dashboard

The dashboard displays two shop locations with their respective session status and closing information.

Shop	Last Closing Date	Last Closing Cash Balance
Shop	10/10/2023	\$ 550.00
Crystal Salon	10/10/2023	\$ 0.00

• POS Screen

The POS screen shows a list of services on the left and a grid of product categories on the right.
